## Details

Wire sculpture, a medium known for its inherent rigidity and masculinity, has been transformed - in this unique sculpture that we propose today - into a triumphant tribute to the graceful curves of the female form. The artist has masterfully fashioned the raw wire, bending it, twisting it, manipulating it with precision and care, to create a sculpture of a woman with its long hair in cascade in a lascive pose.

This juxtaposition of medium and subject matter is intriguing, the artist has imbued an air of delicate sensitivity into the harsh metal.
