Details

This geometric abstract painting features bold intersecting forms in primary colors, evoking a dynamic sense of movement and balance. Dominated by arcs and angular shapes in red, yellow, black, and white, the composition is contained within a structured grid of black lines that lend a sense of order to the energetic visual rhythm. The crisp edges and flat application of color echo the visual language of Roy Lichtenstein and mid-20th-century Pop and Hard-Edge abstraction. Framed in a slim, gold-toned frame, the piece presents a vibrant and structured exploration of color and form.
