Details

Lou Hodges was an American designer whose way to work could be compared to American craftsman by its clean lines, sturdy construction, it's lack of nonfunctionality adornment and the choice of oak. Of course the lines differ and express the new trend of the 70s.

His desks were usually bigger. This is a rare piece.

The desk features a drawer on the left and a file drawer on the right side.

The height of the sides (tops of the legs) is 30".
