

## Teak Lattice Trestles Dining Room Glass Top Table

As low as **\$2,200**

In stock

**SKU**

LU825835727262

### Details

This table made of teak features two lattice-inspired trestles on either side, supporting a thick bevelled glass top. The wooden elements of the table allow for versatile placement at different angles, offering creativity and flexibility to your interior.

I added pictures of some of the 6 Bob & Dries van den Berghe chairs that were coming as a set when I bought them. We did not find the designer of the table.
